LN Setting Tool

The TIW® LN Setting Tool is designed to run and set liners. It has a right-hand release setting nut that carries the liner assembly to setting depth. The floating nut and ball bearing is incorporated in the tool for easy release. When 3,000 to 5,000 lbs. of drill pipe weight is applied to the setting nut housing, 12 to 15 turns will release the setting tool from the liner.

Features

- Ball bearing incorporated in tool for easy release
- Spring-loaded nut for easier installation
