SJ Setting Tool

The TIW® SJ Setting Tool is designed to accommodate the high rotational torque required for rotating and setting long, heavy liners in high-angle or deviated holes. It has an exclusive non-re-engageable feature, preventing re-engagement due to residual torque. It is designed to be used with a LG Setting Collar with C-Clutch. It is recommended to be used with a right-hand set liner hanger. The SJ Setting Tool is furnished with setting dogs when a liner top packer is used.

Features

- Ball bearing incorporated in the tool for easy release
- Spring induced clutch system
- Exclusive non-re-engagable feature
- Adjustable shear value for setting tool nut
