Completion Packers

SS & SS-BB Packer

The TIW® SS Packer and SS-BB (Big Bore) Packer are among the most advanced permanent packers available. Designed as high pressure permanent casing packers in a single, alternate-selective, or multiple string completions, these packers have versatile setting methods, allowing these tools to be set any of three ways: wireline, hydraulically or mechanically.

Applications

- Production
- Stimulation / Treating
- Water Flooding
- Thermal
- Testing
- Temporary Bridge Plug
